RE: Removal and Disposal of Salvage buoys located in WA Narrows

Global Diving & Salvage, Inc. is pleased to have the opportunity to present this proposal for the removal of 2 salvage buoys.

Operational Approach

Global has calculated the weight of the buoys and will utilize a 200 ton crane barge from American construction with a 200' boom to execute the lift. The buoy will then be cut into 25 ton pieces for disposal directly onto the dock at Schnitzer Steel marine facility in Tacoma. The duration of the project is anticipated to be 2 days. Global is willing to discuss and work on a time and material basis or fixed price.

- Buoys will be free of Hazardous materials
- Global will coordinate disposal at Schnitzer Steel in Tacoma
